

## Gaming mouse Havit GAMENOTE MS1001S RGB 800-4800 DPI

Gaming mouse Havit GAMENOTE MS1001S RGB 800-4800 DPI

Ref: 6939119023096

### Multifunctionality

The programmable gaming mouse is equipped with an optical sensor, providing motion sensitivity up to 4800DPI (800-1600-2400-3200-4000-4800DPI). By adjusting the mouse movement sensitivity, you can perfectly match it to your needs and specific gaming situation. What's more, it has software that allows you to program macro keys, so it will meet the expectations of even the most demanding players.

### Under control

With the Havit MS1001 mouse, you can have full control over the RGB illumination through the user panel included in the software. Match the mouse backlight to your game and create your own unique atmosphere.

### Full precision

Offers 6 speed levels with which you can adjust the mouse sensitivity according to your preference. You will see the change in the DPI level with the help of the button backlight. This allows you to adjust the sensitivity of your mouse movements to suit the situation and game.

### Ergonomics

Thanks to its ergonomic shape, the mouse fits perfectly in your hand, and long use during duels does not cause hand fatigue. Thanks to the high quality and nice to the touch materials and anti-slip surface, using the mouse is extremely comfortable and convenient.
