

## Charging Safeguard Gens ace for 2S-6S Lipo Battery Charger

Ref: 6928493356845

Charging Safeguard Gens ace for 2S-6S Lipo Battery Charger Protector

The Gens Ace LiPo 2S-6S battery charger protector

The Gens ace LiPo 2S-6S Battery Charging Protector has an automatic shut-off function, the charger adapter connector is designed for 2S-6S lithium polymer batteries (nominal voltage 3.7V/cell). It has several features to safely charge the LiPo pack.

### ATTENTION:

Do not reverse the polarity of the connector. Do not short circuit any connectors together. Do not leave this product unattended while charging. Stop using the Protector if you notice anything alarming. Do not charge batteries whose voltage is not within the correct range. USE ONLY with lithium polymer batteries. DO NOT use any other battery chemistry with charge protection. Keep the charging cover away from dust, moisture, rain and heat sources. Avoid direct sunlight and strong vibrations.
