IP Indoor Camera Arenti Dome1 2K 5G

Ref: 6972055681357

Arenti Dome1 WiFi 2K 5G indoor IP camera

Are you looking for a device that will allow you to easily take care of your and your household members' security? Arenti indoor camera was created just for that! Thanks to its 2K resolution, it allows you to get high-quality images. It uses motion and noise tracking, supports two-way audio and works with iOS and Android, allowing you to remotely monitor your premises in real time. Supervise your home and pets when you're not at home, or keep an eye on the kids playing in the next room and be reassured of their safety. The device's clever design allows you to position the camera any way you want, giving you the freedom to choose the areas you monitor.

It won't miss movement and noise

The Dome 1 camera uses an intelligent system to detect human motion and noise. It automatically starts recording when someone comes within range of the camera or when the microphone records a sound that may indicate an unwanted event. What's more, you will be instantly notified of their detection via the app. With the Arenti camera, you can quickly detect unwanted situations and even prevent them!

Fantastic image quality

The camera is distinguished by the excellent quality of the recorded image, regardless of the time of day. It offers Ultra HD 2K quality - even at night. Such quality will allow you to easily identify a person or animal within the camera's range, and see almost every detail.

The device creates short, 180-second recordings, which you can access at any time. This will not only give you a better understanding of what's going on at home in your absence, but also give you detailed footage in case of unwanted events, such as break-ins and the like. With Arenti you gain the upper hand and are prepared for any circumstance!

Customize the monitoring area yourself

The device operates fully wirelessly, and its installation requires no additional wiring. This means you can conveniently place it anywhere. What's more, the thoughtful design of the camera allows you to customize its positioning - rotate it 350° or tilt it -20-90°. Noteworthy is the function of custom setting of the motion detection area, which allows you to monitor the selected area more precisely. All this means that you can be in control of what is happening in your home at any time and enjoy a sense of security.

Two-way audio support

Dome 1 not only responds to noise, but also supports two-way audio. What does this mean for you? You can use your phone to speak directly to children playing within range of the camera, admonish your four-legged friend when he's messing around, and scare off a potential burglar. Gain control in your apartment, even when you're not in it!

Easy management with an app

The camera saves recorded footage on an SD card (up to 256 GB) or in the cloud. In the app you decide yourself where you prefer to store your files. With support for Android/iOS mobile devices, you can remotely monitor the situation in the room in real time at any time. In addition, the camera is compatible with Amazon Alexa and Google Assistant voice assistants, allowing you to fully control it with your voice. With one simple command, the camera's image will appear on your phone's screen. Check out how easy it is to make sure everyone is safe in your home!

Included

Camera

Bracket

Adapter and cable

Screw package

Warning sticker

Image sensor

1/3" 3Megapixel CMOS sensor

Effective pixels

2304(H)*1296(V)

Shutter

1/15~1/10,000s

Min illumination

Color 0.1Lux@F2.0 ; Black and white 0.01Lux@F2.0

Infrared distance

Night visibility up to 10m

Day/Night

Auto(ICR)/Color/Black/White

WDR

DWDR

Lens
