

Battery Green Cell A41-X550A A41-X550 for Asus A550 K550 R51

Ref: 5902701412401

Battery Green Cell A41-X550A A41-X550 for Asus A550 K550 R510 R510C R510L X550 X550C X550CA X550CC X550L X550V X550VC

Green Cell Battery A41-X550A A41-X550 for Asus A550 K550 R510 R510C R510L X550 X550C X550CA X550CC X550L X550V X550VC

Give your laptop a new lease of life with Green Cell batteries. The use of top-quality components and a perfect fit, will restore the mobility of your laptop. You can easily fit it in your device and you can be sure of full compatibility with your notebook's electronics and software.

Top performance

Designed to provide the highest possible performance, the battery uses high-quality Green Cell lithium-ion cells. What's more, it is equipped with state-of-the-art control electronics and housed in durable ABS plastic. The entire unit is precisely manufactured and thoroughly tested.

High-quality lithium-ion cells from Green Cell

Green Cell Li-Ion cells are proven rechargeable batteries with high, real capacity, high durability and no memory effect. They are the heart of the battery, providing a long operating time of 1.5 to 5 hours. They stand out with a high capacity of 2200 mAh - 20% more than other batteries with unbranded, low-quality cells. What's more, these cells are highly durable. They can withstand up to 1,000 charging cycles, which translates into 2-3 years of trouble-free operation. Their capacity decreases very slowly and after 300 charge cycles (approximately 1 year of operation) they still retain more than 80% of their capacity.

Modern control electronics

Thanks to this, the battery communicates with the laptop, providing information about the state of charge, remaining operating time or time to full charge. Most models use electronics from the renowned Texas Instruments company also used in the original batteries. This gives you a 100% match with your computer's electronics and controllers - the battery communicates with your laptop exactly as the original battery would. What's more, it also guarantees advanced protection against over-discharge, over-charging and thermal protection.

Precision craftsmanship

Top-quality materials and an accurately reproduced shape make the battery a perfect fit in the laptop case and easy to install. In addition, the housing is physically resistant and protects the sensitive cells and electronics. A new battery is a better and more economical alternative than changing your computer. Not only will you save money, but you will also take care of the environment.

□Manufacturer

□Green Cell

□Model

□AS58

□Capacity

□2200 mAh

□Number of cells

□4

□Cell type

□Li-Ion

□Voltage

□14.4 V / 14.8 V

□Operating time

□1.5 to 5 h

□Overcharge protection

□Yes

□Deep discharge protection

□Yes
