Set of 4 filters Split ND Freewell for DJI Air 3

Ref: 6972971864407

Set of 4 filters Split ND Freewell for DJI Air 3

The set of 4 Freewell Split ND Filters is an essential accessory for anyone wanting to achieve balanced exposure and capture beautiful landscapes using the DJI Air 3 drone. The set includes four Split ND (Split Neutral Density) filters - ND8/ND16, ND16/ND32, ND32/ND64, and ND64/ND128, allowing control of the amount of light entering the lens and achieving the correct exposure.

Designed for Various Lighting Conditions

Meticulously calibrated for different apertures of Air 3 at focal lengths of 70mm and 24mm, the Split ND filters ensure high-quality exposure. They ensure that the footage remains optimally exposed at both focal lengths, maintaining high image quality. It also eliminates the need for constant aperture adjustment during flight, allowing you to focus on capturing the perfect shot. Whether you want to take photos in bright sunlight or achieve a blur effect, with Freewell you will achieve stunning results!

Thoughtful Design

Mounting the filters will not pose any problem for you. You also don't have to worry about them interfering with the drone's operation - the filters are extremely light. The set also includes a case, which allows for safe storage of the filters and protects them from damage. Meanwhile, the cleaning cloth makes it easy to keep them clean.

Included in the Set

filters (ND8/ND16, ND16/ND32, ND32/ND64, ND64/ND128)
