Rojeco 6 Meals Automatic Pet Feeder 3600mAh

Take care of your pet's health by providing valuable meals at regular times, even when you're away from home. Rojeco's smart pet food dispenser is equipped with 6 compartments that can store both dry and wet food, snacks, as well as water or medication that your four-legged friend needs to take. It ensures the freshness of the meals served and acts as a refrigerator. Using the control panel, you will adjust the eating times according to your pet's needs. The powerful battery allows up to 30 days of operation, and a practical indicator will notify you when it needs to be recharged. Cleaning the device is smooth and hassle-free. In addition, a child lock eliminates the risk of accidental activation of the dispenser, and non-slip components ensure stability. Noiseless operation and compact size are other advantages of the product.

Large capacity

Rojeco's smart food dispenser is equipped with 6 compartments (with a capacity of 600 ml each) for storing dry and wet food, snacks, water, goat milk, freeze-dried food of various sizes, as well as medicines and supplements. With such a large capacity, you can easily plan nutrient-rich meals for your pet for the entire day.

Guaranteed freshness

The dispenser uses two cooling pads to keep meals fresh around the clock. During the first 8 hours, the dispenser keeps food at 0°C.

After that time, it still maintains a sufficiently low storage temperature. So you don't have to worry about food quality for up to 24 hours. However, it is recommended that meat meals be consumed by your pet within 4 to 8 hours. Canned food, on the other hand, is suitable for consumption throughout the day.

30 days of operation on a single charge

Thanks to the fact that the Rejeco is equipped with a 3600 mAh lithium battery, one charge provides up to 30 days of operation. A practical indicator signals a low charge, so you'll always know when to renew the dispenser's energy.

Careful craftsmanship

Rejeco's product is distinguished by its compact design - its dimensions are only 320 x 327 x 87 mm, so you can set it up anywhere. The child lock has eliminated the risk of unwanted activation of the dispenser, and the solid closure protects its contents. In addition, it operates completely silently, without disturbing the household or stressing your pet. The non-slip mat guarantees stability and allows the pet to have a meal without interference.

Hassle-free maintenance

Cleaning the Rejeco dispenser takes just 10 seconds. Its disassembly is efficient and hassle-free. You can wash it under running water without any problems.

Ease of use

The control panel allows you to set the meal time. This way you can make sure that your beloved pet eats regularly.

□Manufacturer

□Rojeco

□Model

□RWSQ-07

□Intended use

□small dogs / cats

□Dispenser capacity

□200 ml x 6 (approximately 85-90 g x 6)

□Battery capacity

□3600 mAh
