

VGA(3+6) Male to Male Cable with Ferrite Cores 3m Vention DA

Ref: 6922794741638

VGA(3+6) Male to Male Cable with Ferrite Cores 3m Vention DAEBI (Black)

Vention DAEBI ferrite-core VGA(3+6) male-to-male cable (3m, black)

Arrange your own home theater. The Vention VGA (3+6) cable provides excellent 1080p HD picture quality and is widely compatible. It supports 2 display modes and provides stable, high-speed signal transmission. Its length is 3 meters.

High picture quality

Delight in the 1080p picture and appreciate the richness of detail when watching your favorite movies on the big screen. The Vention cable allows you to view the image in 2 modes. The first is Dual-screen Mirror Mode, which synchronizes the display of one image on two screens - perfect for presentations or content sharing. The second is Dual-screen Expansion Mode, which allows you to display different content on each screen.

Wide compatibility

The Vention cable is compatible with a wide range of devices, including laptops, media players, TVs, monitors and projectors. So you can use it at home, at university, or at work - the possibilities are indeed many!

Thoughtful design

The construction of the cable has been carefully designed to ensure not only excellent image quality, but a stable signal. Dual ferrite

cores eliminate interference, and the use of pure copper ensures long cable life. In addition, gold-plated terminations increase signal conductivity and corrosion resistance. Thus, the product will reliably serve you for a long time.
