Vention HCDBF HD DisplayPort 1.4 8K Cable 1m Black

In an era of technological progress, the right cable can work wonders for your audio-visual experience. Introducing the Vention HCDBF cable — a combination of innovation and reliability. It provides excellent image and sound quality, while offering advanced features for a wide range of applications. Here's what makes it special.

High Bandwidth for Excellent Image Quality

The Vention HCDBF cable is characterized by an impressive bandwidth of 32.4 Gbps, which translates to the ability to transmit 8K@60Hz quality images. As a result, it is an excellent choice for those who value crystal-clear images, free of delays or distortions. Whether you plan to use it in a professional studio or for home cinema, this cable will surely meet your expectations.

Versatility in Screen Sharing

One of the main advantages of the HCDBF cable is its support for various screen sharing modes. Users can choose from modes such as mirror mode, extend mode, or split-screen mode. This allows you to customize the display of content exactly as you need it — whether for presentations, gaming, or work.

Advanced Audio-Visual Support

The Vention HCDBF cable is not only about image quality but also sound. Support for dynamic HDR ensures better color reproduction and deeper contrasts, while 32-bit audio provides a clear and detailed sound. Additionally, the cable supports G-sync & Free sync technologies, making it perfect for gamers who value smooth gameplay.

Thoughtful Design

The cable is made of durable PVC material, which ensures its durability for everyday use. The classic black color will discreetly blend into any interior. A length of 1m is a compromise between functionality and comfort of use, regardless of where you decide to use it. By choosing the HCDBF model from Vention, you're investing in quality and versatility.
