Automatic Car Phone Holder Vention KCEH0 with Clip Gray

Automatic Car Vent Mount for Phones by Vention

The Vention car vent mount stands out due to its compact size, which is a key advantage for those who appreciate compact and practical solutions. This makes it easy to fit into the car's glove compartment, taking up minimal space and always within reach when needed. Additionally, it does not block the ventilation grille, allowing for unrestricted airflow in the car cabin.

Stability and Security of the Mount

There's nothing worse than a mount that allows your phone to fall out while driving. The Vention mount is designed to provide maximum stability. Whether you're driving on uneven roads or making quick turns, you can be confident that your phone will stay securely in place.

Universality

The key to the mount's functionality is its ability to adapt to different phone models. Thanks to the adjustable arm width, this mount easily fits many smartphone models, both smaller and larger ones. This means that users don't have to worry about compatibility when changing their phones.

Ball Joint Pivot - Flexible Positioning

With the ball joint pivot in the Vention mount, this problem becomes a thing of the past. The ability to rotate and position the mount at

any angle allows for perfect alignment with the driver's line of sight, ensuring comfort and safety.

Charging While in Use

Using navigation or listening to music in the car can quickly drain your phone's battery. Fortunately, the Vention mount has a built-in cutout for a USB-C port. This allows for easy charging, even when the phone is already in the mount, ensuring that your smartphone is always charged and ready to go.
