QCY ANC H4 wireless earphones (black)

The QCY H4 provide an amazing sound experience. Equipped with 40-millimeter drivers, they reproduce sound of the highest quality, certified by Hi-Res Audio. Active noise cancellation technology effectively eliminates outside sounds, allowing you to focus on what matters most. They allow music playback for up to 70 hours, and dual microphones combined with ENC guarantee clear phone calls. You'll connect them to the device of your choice either wired or wirelessly. The dedicated QCY app will allow you to customize the sound settings for any type of music.

Top-quality sound

With the QCY H4, you'll experience sound like you've never heard before. With 40mm drivers and a wide frequency response of up to 40kHz, the QCY H4s deliver incredibly clear and precise sound. They are also Hi-Res Audio certified to reproduce studio-quality sound. Now you can hear every detail of your favorite songs - from deep bass to the highest tones.

Forget the noise

Immerse yourself in the sounds of music or focus on your work, no matter where you are. With ANC technology, the earphones reduce ambient noise to as much as 43 dB. That means you can enjoy your music without the distracting sounds of the street, office or other distractions. The QCY H4 also offers four ANC modes, which vary in the level of muting of outside sounds. There's also an Ambient Sound

mode, which allows you to stay in touch with your surroundings without removing the earphones, which is useful in city traffic, for example.

Listen without interruption

The QCY H4 are ready to accompany you for days without interruption, no matter how intensively you use them. They feature a 600 mAh battery that provides up to 60 hours of use with ANC mode on, or up to 70 hours with ANC off. That's enough time to watch 35 movies or play 1,050 songs of music!

Talk without distractions

Whether you're having an important business conversation or chatting with friends, you can always count on excellent sound quality with the QCY H4. The earphones are equipped with dual microphones that accurately capture your voice, ensuring that it sounds clear and natural. They also use ENC technology, which eliminates background sound interference during calls.

Stable connection with low latency

Let music accompany you wherever you go. The earphones use Bluetooth 5.1, which offers a fast and stable connection to your device with a range of up to 10 meters. The low latency of only 0.08 seconds in gaming mode ensures that the sound is perfectly synchronized with the video, which is extremely important when playing online.

Take calls while watching movies

The QCY H4s allow you to connect to two devices simultaneously. This allows you to listen to music from your laptop and take calls from your phone, without having to constantly switch calls or disconnect and reconnect. Are you watching a movie on your tablet and your phone suddenly starts ringing? Just double-tap the earphones to answer the call!

Convenience first

The earphones were created with your comfort in mind. Soft earcups made of synthetic protein leather perfectly fit the shape of your ears, reducing pressure. As a result, you don't have to worry about discomfort even during hours of listening. The foldable design means you can take them with you wherever you want - they won't take up much space in your backpack. The QCY H4 also settle intuitive buttons that will allow you to adjust the volume, switch songs, answer and reject calls - all without having to pull out your phone.
