Ref: 6972971864582

Set of 16 filters Freewell for DJI Mini 4 Pro drone

Unlock limitless creative possibilities with Freewell's offering designed for the DJI Mini 4 Pro drone. The kit includes a variety of filters, including ND16-ND1000, ND16/PL-ND256/PL, UV, CPL, Snow Mist 1/4, and Light Pollution filters, allowing you to prepare for shooting in any conditions. All components of the kit have been meticulously designed and stand out for their high quality.

Precision Exposure Control

ND filters allow you to control the amount of light entering the lens, enabling precise exposure adjustment. They also create a polarization effect, significantly improving sharpness and color saturation in recordings.

Protection and Versatility

UV and CPL filters offer additional protection and versatility. The UV filter protects the lens from harmful UV radiation, while the CPL filter effectively reduces glare and reflections, ensuring higher image quality even in challenging lighting conditions.

Expanding Creative Possibilities

Specialized filters like Snow Mist 1/4 and Light Pollution open up new creative possibilities. Snow Mist 1/4 adds an ethereal, dreamy character to recordings, while Light Pollution allows for clear and pristine nightscapes.

Safe Usage

With GimbalSafe technology, you can be sure that none of the filters will burden the drone's gimbal. The accessories also feature coatings that are resistant to dust, scratches, and grease. They are color-neutral, ensuring the best image quality outdoors.

Included in the Set:

ND16 Filter
ND32 Filter
ND64 Filter
ND128 Filter
ND256 Filter
ND512 Filter
ND1000 Filter
SMIST1/4 Filter
UV Filter
