

Camera filter ND64/PL Freewell to DJI Mini 4 Pro

Ref: 6972971864711

Camera filter ND64/PL Freewell to DJI Mini 4 Pro

Freewell DJI Mini 4 Pro ND64/PL Hybrid Camera Lens

Protect your camera lens and increase the quality of your shots with Freewell's offering. The ND64/PL filter provides protection against scratches, water and dust, as well as effective polarisation. It also reduces the amount of light coming through the lens. The product is made from high grade optical glass and aluminium alloy. It is distinguished by its light weight - you don't have to worry about stressing your device.

Effective performance

The ND64/PL filter combines the properties of a neutral and polarising filter. As a result, it provides effective polarisation and glare reduction to help you capture shots with realistic colour with ease. The product also helps to control camera exposure settings when shooting or recording outdoors and offers 6-stop compensation to reduce shutter speed. It is perfect for sunny days.

Refined construction

Freewell's product is made of high-quality optical glass and aluminium alloy. The filters have been coated with a special coating that is dustproof, oilproof and scratch-resistant.
