Filter UV PGYTECH for DJI Air 2S (P-16B-060)

Ref: 6970801336827

UV Filter for DJI Air 2S PGYTECH P-16B-060

Are you looking for a way to get even better quality images taken with your DJI Air 2S? Try the PGYTECH brand UV filter, which blocks blue light and provides fantastic results. The product is made from premium German SCHOTT glass and aviation aluminum, so it's incredibly lightweight yet durable. Special protective coatings protect it from dirt and damage. The filter is also easy to install and features a perfect fit for the DJI Air 2S.

Highest image quality

Creating stunning aerial photography may be easier than you think. Made from repeatedly ground and polished SCHOTT glass, the UV filter prevents UV rays from entering the lens. It also blocks blue light, so you can easily eliminate unwanted blue or whitish tones from your photos. This product is therefore ideal for capturing open areas such as seascapes and vast fields. The filter will also help you avoid unwanted reflections, while maintaining vivid, natural colors.

Forget about cleaning problems

The product is surprisingly durable and easy to maintain. It's coated with a 2-sided, multi-layer nano-coating that repels water and grease, so you can easily keep it clean. The filter is also scratch-resistant. It will serve you perfectly for a long time.

Made for DJI Air 2S

Concerned that the accessory will overload your drone and affect flight quality? Don't be! The filter weighs just 1.8g. The frame made of CNC aerospace aluminum gives it incredible lightness and strength at the same time. It is also distinguished by resistance to corrosion. The product is also perfectly matched to the DJI Air 2S. It will not disturb its balance and will allow you to enjoy a smooth, exciting flight.
