ND-PL 8/16/32/64 filter set for DJI Air 2S PGYTECH P-16B-063

Are you looking for a way to get even better quality images taken with your DJI Air 2S? Try PGYTECH's ND-PL hybrid filters, which prevent unwanted glare and provide great color saturation. They also allow you to record stunningly smooth aerial videos. Made from high-grade, German-made SCHOTT glass and aviation aluminum - they are incredibly lightweight yet durable. Special protective coatings protect them from dirt and damage. The filters are also easy to install and stand out for their perfect fit on the DJI Air 2S.

Highest image quality

Creating stunning aerial video and photography may be easier than you think. Made from repeatedly ground and polished SCHOTT glass, ND-PL filters are responsible for fantastic color saturation and provide unparalleled sharpness and clarity in images. They also eliminate unnecessary glare. They are also ideal for use when recording video. They reduce shutter speed and prevent overexposure for incredibly smooth, cinematic results. You can also change the polarizing effect by rotating the filter.

Forget the hassle of cleaning

The accessories are surprisingly durable and easy to maintain. They've been coated with a 2-sided, multi-layer nano-coating that repels water and oil, so you can easily keep them clean. The filters are also scratch resistant. They will serve you perfectly for a long time.

Made for DJI Air 2S

Fear that accessories will overload your drone and affect flight quality? Don't be! The weight of each filter is only 2g. The frame made of CNC aircraft aluminum gives them incredible lightness, yet strength. It is also distinguished by resistance to corrosion. At the same time, the products are perfectly matched to the DJI Air 2S. They will not disturb its balance and allow you to enjoy a smooth, exciting flight.

Brand
PGYTECH
Name
DJI Air 2S Filter (Professional)
Model
P-16B-063
Material
Aluminum, optical glass
Net weight
2g x4
Dimensions
29x23.6x5.1mm
Filter effect
Polarization block, shutter speed reduction, film - motion blur effect, photography - longer exposure time
Effect on colors
Dehaze, prevention of overexposure, increased saturation/contrast, increased clarity
Suitable for
DJI Air 2S

Preço:

Antes: € 57.9945
