

Wire Stripper 0.6-2.6mm Deli Tools EDL2607 (black&yellow)

Wire Stripper 0.6-2.6mm Deli Tools EDL2607 (black&yellow)

Ref: 6973107487286

Deli insulation stripper

If you make electrical repairs or are interested in DIY, the Deli brand insulation stripper is sure to come in handy. The high-carbon steel body with heat-treated surface guarantees fast and precise cutting. The tool is equipped with a two-color ergonomic handle made of polypropylene, which has been additionally coated with PVC. This makes it non-slip, provides a stable grip and allows you to hold even very small parts. With the help of the product, you can easily remove insulation from electrical and electronic wires with a cross-section of 0.6 mm to 2.6 mm. The puller also has a built-in cutter, which makes it suitable for cutting wire as well. What's more, an automatically bouncing spring makes work easier, and a special locking mechanism makes it safer to use.
