

### Filter VND 2-5 stop PGYTECH for DJI Air 2S (P-16B-064)

Filter VND 2-5 stop PGYTECH for DJI Air 2S (P-16B-064)

Ref: 6970801336865

VND 2-5 stop filter for DJI Air 2S PGYTECH P-16B-064

Create even more stunning images with your DJI Air 2S. PGYTECH's 2-5 stop VND filter will give you unparalleled control over your shutter speed and allow you to capture smooth aerial videos. Using it, you will adjust the amount of light reaching your drone's camera in no time. The accessory is made of high-quality, German-made SCHOTT glass, and the 2-sided protective coating protects it from stains and damage. The filter is also easy to install, incredibly lightweight and fits perfectly on the DJI Air 2S.

4in1 - works well in different lighting conditions

The 2-5 stop VND filter will allow you to get even better results. With its help you can precisely control the shutter speed to create breathtaking, smooth, cinematic shots. The accessory is perfect for outdoor use. You no longer have to waste time changing the filter when the light conditions change. Simply twist the P-16B-064 to adjust the amount of light that enters the lens. You can conveniently choose from ND4, ND8, ND16 and ND32 equivalents, giving you the freedom you dream of. When you buy this practical accessory, you actually gain 4 ND filters in 1!

Highest quality workmanship

The product was designed with even the most demanding users in mind. Made of repeatedly ground and polished SCHOTT glass - it provides stunning photo and video quality. What's more, the 2-sided, multi-layer coating repels water and oil, making keeping the

accessory clean a breeze. The filter is also scratch resistant.

Made for DJI Air 2S

The filter frame is made from corrosion-resistant, aircraft-grade CNC aluminum, which makes the accessory incredibly durable, yet lightweight - weighing only 3g. So it will not be an excessive burden on your drone, nor will it affect its performance and balance. The product is perfectly matched to the DJI Air 2S. It will allow you to not only get excellent quality images, but also enjoy a smooth, exciting flight.
