Monitor Koorui 24E3 24" 1920x1080px 165Hz

Looking for the perfect monitor to be the perfect companion to any gaming experience? The Koorui 24E3 features a 24-inch display that provides a wide color gamut for more realistic images. What's more, it provides low latency, as its response time is only 1 ms! It stands out with a refresh rate of 165 Hz, thus enabling smooth gaming sessions. Enjoy uninterrupted performance together with Koorui!

Image of the highest quality

Meet the 23.8-inch monitor that features the latest generation of IPS panel, offering unparalleled image quality. With a wide sRGB color gamut of 99% and the ability to display more than 16.7 million colors, every image comes to life in its full glory. This is ideal for gamers who value accurate color reproduction without the risk of fading. Regardless of the angle from which you look, colors are realistic, full of detail and maintain consistency. So you can rest assured that the image quality will remain top-notch from any angle.

Created with gaming fans in mind

The Koorui monitor is perfect for gaming, as it combines an advanced refresh rate of 165 Hz with state-of-the-art Adaptive Sync technology. As a result, it provides an extremely smooth and harmonious experience during gaming sessions. Game mode allows players to see the finest details in the dark, which gives an advantage when fighting enemies hiding in the shadows. With precise positioning, shots become more accurate, increasing your hit rate and giving you a competitive edge.

Thoughtful design

The Koorui 24E3 computer monitor combines master craftsmanship with modern design, distinguished by its ultra-thin case. Its stand, in addition to quick mounting, offers tilt adjustment for added comfort. In addition, thanks to the VESA wall mount, the monitor can be easily mounted in almost any environment, adapting to the user's individual needs.

Multiple connectivity options

KOORUI brand monitors are synonymous with excellent image quality and versatility. They are equipped with HDMI and DisplayPort ports, making it easy to connect to a variety of devices. This gaming monitor model, with a refresh rate of 165 Hz, is compatible with most popular graphics cards and offers the user an FHD resolution of 1920x1080p. Thanks to its clever design, it can be easily connected to an Xbox console, PC or laptop, providing clear and high-quality images whether you're working or enjoying entertainment.
