

Electric Vehicle charger Choetech ACG14 3.5 kW with LCD disp

Ref: 6932112105813

Electric Vehicle charger Choetech ACG14 3.5 kW with LCD display (white)

Choetech ACG14 3.5 kW electric car charger with LCD display (white).

Choetech ACG14 3.5 kW electric car charger is distinguished by its advanced way of communicating with the user. Through LED lights, it informs you of various charging states, such as overheating, charging mode and standby mode. This practical solution provides clear guidance during the process of charging the vehicle and handling the device.

Advanced current regulation technology

The ACG14 features advanced current regulation technology. With a choice of 4 stages (16/13/10/8A) of variable output current regulation, the charger adapts to different needs and characteristics of electric vehicles. This enables more precise charging.

Friendly LCD screen and durability

The presence of an LCD screen is another distinguishing feature of this charger. This screen provides the user with important information about the charging process and the current status. The operating and storage temperature ranges of -25°C to 45°C and -40°C to 80°C, combined with the IP66 rating, highlight the durability and flexibility of operation in a variety of conditions.
