

Electric Vehicle charger Choetech ACG15 3.5 kW with LCD disp

Ref: 6932112105820

Electric Vehicle charger Choetech ACG15 3.5 kW with LCD display (white)

Choetech ACG15 7 kW electric car charger with LCD display (white).

Choetech ACG15 3.5 kW electric car charger is distinguished by its advanced approach to user communication. Through the use of LEDs, it provides information on the various stages of charging, such as overheating, charging mode and standby mode. This practical solution provides guidance during the process of charging the vehicle and operating the device.

Output current adjustment

With the ability to choose from four stages of AC output current adjustment (16/13/10/8A), the charger is able to adapt to a variety of requirements and differences in electric vehicle performance. This functionality enables more accurate and precise charging.

Friendly LCD screen and durability

The presence of an LCD screen is another important feature that distinguishes this charger. This screen provides the user with important information about the charging process and the current status of the device. Extensive operating and storage temperature ranges, from -25°C to 45°C and -40°C to 80°C, combined with IP66 protection, highlight the ruggedness and flexibility of operation in a variety of conditions.
