

Smart Touch Wi-Fi Wall Switch Sonoff TX T5 1C (1-Channel)

Ref: 6920075740219

Smart Touch Wi-Fi Wall Switch Sonoff TX T5 1C (1-Channel)

Smart Touch Wi-Fi Wall Switch Sonoff TX T5 1C (1-Channel)

Create a smart home with Sonoff. The TX T5 1C is a single-channel wall switch that allows you to conveniently control your lighting. You can also control it remotely using voice commands or the eWeLink app. What's more, the product offers a timer function and colorful LED backlighting that you can customize. You can also personalize the look of the switch using the color panels (not included).

Voice control

Do you want to turn off the lights in your living room without having to get up from the couch? With the Sonoff TX T5 1C, that's not a problem. The wall switch works with assistants such as Amazon Alexa, Google Home and Alice. All it takes is a simple voice command — you no longer have to tear yourself away from your favorite TV series.

Two-way lighting control

The switch can be used as an eWeLink gateway. This allows you to create smart scenes that let both the TX T5 1C and the R5 or S-MATE (not included) control the operation of a single lamp. Enjoy the possibilities Sonoff offers without all the unnecessary wiring.

Additional capabilities

The switch has a built-in timer that will allow you to customize the time at which the light will turn off automatically, and a colored

backlight around the switch will be activated. This allows you to easily locate the device after dark. What's more, it is possible to enable smart scenes, and the built-in speaker makes it possible for the switch to act as a doorbell - for this purpose you need the Sonoff SNZB-01.

Touch panel and color backlighting

The Sonoff TX T5 1C is equipped with a large touch panel, so you can click any area to turn on a light, for example. The device will signal the command with a beep and gentle vibration. In addition, it offers 8 types of color backlighting, with Party, Night Light and Color modes available, among others. Choose the right one for you.
