Haylou GT5 wireless headphones

The Haylou GT5 Wireless Headphones feature a long operating time of up to 24 hours, comfortable touch control, as well as excellent sound quality and stable Bluetooth 5.0 transmission. They also offer a unique gaming mode. See for yourself that playing games, listening to music and making phone calls can be even more enjoyable than before.

Play your favorite games without interruption

A special gaming mode offers deepening immersion, spatial sound. It is also characterized by extremely low latency of 65 ms. All this makes it possible for you to enjoy undisturbed, dynamic gaming regardless of the situation. No one, even the most demanding opponent will surprise you - you will immediately hear that he is approaching and you will be able to meet him.

Immerse yourself in the world of sounds

Advanced signal encoding, noise reduction technology and a 7.2 mm polymer cone - these 3 factors guarantee a natural, crystal-clear sound. GT5 also offers Hi-fi stereo sound quality. This will give you the impression that your caller is standing right next to you when talking on the phone.

Enjoy reliable transmission

The modern Bluetooth 5.0 connection provides instant, stable and almost lossless signal transmission. With Haylou GT5 you will say goodbye to the delays - you will enjoy a reliable connection and extraordinary sound quality. An additional advantage of the devices is automatic pairing - forget about the cumbersome complicated configuration.

Enjoy unlimited freedom

Each handset individually connects to the device you choose. Thanks to this you can quickly and easily switch between mono and stereo mode. No matter which handset you pick up, you will instantly establish a stable connection.

You won't miss anything anymore

The intelligent system immediately recognizes if you are wearing headphones. When you take them out of your ears, playback will stop automatically. Put them back in to resume. You don't have to press any buttons or reach for the phone - GT5 will make sure you won't miss anything.

Listen without limits

Fully charged Haylou GT5 allows you to listen to music for 4 hours. Using the 600 mAh charging case, you can extend this time up to 24 hours. Use it as you like - play your favorite songs, watch TV series, play games or talk to your loved ones. Everything depends on you. You can charge GT5 via USB-C cable or wirelessly with your phone or induction charger. A special indicator will give you information about the battery status.

Just touch

Convenient operation of the headphones is possible thanks to a sensitive touch panel. You will no longer be disturbed by the physical, frustrating buttons. Just gently touch the device to answer the phone, rewind a song, increase the volume, stop the playback, wake up the voice assistant or start gaming mode, for example..

Use the services of an assistant

Haylou GT5 also enables voice control of Google, Siri or Xiaoai assistant. Wake up your smart assistant by touching the left handset 3 times. Then you can call a friend, ask for a weather forecast or play your favorite songs while keeping your hands free. This practical solution provides you with comfort as well as safety when, for example, driving a car.

The convenience you deserve

The headphones are characterized by ergonomic design and light weight of 3,9 g. They are made of durable, yet skin-friendly materials. They fit perfectly to the shape of the ears and lie comfortably in them even throughout the day. Forget about uncomfortable or falling out headphones - using GT5, you will not even feel that you are wearing them.
