Haylou MoriPods Wireless Bluetooth Headphones

Take your music experience to a new level. The Haylou MoriPods wireless headphones feature 12mm drivers that deliver superior sound quality. Bluetooth 5.2 provides instant, stable signal transmission and the long-lasting battery allows you to listen to music for up to 6 hours on a single charge. The product supports the aptX Adaptive codec, and with CVC noise cancellation, you can talk freely on the phone almost anywhere.

Discover the magic of music anew

With Haylou you will discover previously unheard details of your favorite songs. Large 12mm drivers provide crystal-clear, fantastically balanced stereo sound. You'll be amazed by the perfectly emphasized bass and crisp, ear-pleasing highs. See how the magic of music can be even more powerful!

Reliable Bluetooth 5.2 connection

Say goodbye to connection problems. The Qualcomm QCC3040 chip and next-generation Bluetooth 5.2 ensure stable transmission with a range of up to 10m and much faster pairing. It also allows you to conveniently switch between mono and stereo modes. Each headphone connects independently to the device of your choice, allowing you to use them in different configurations or even share your music with a friend! Bluetooth 5.2 also provides extensive compatibility for Haylou MoriPods.

Low latency for dynamic gameplay

The surprises don't end there! Haylou MoriPods support the next generation aptX Adaptive codec, which allows you to enjoy fast, stable and lossless signal transmission, as well as excellent Hi-Fi level audio quality. It also guarantees exceptionally low latency, so you can play your favorite games without interruption. The perfect synchronization of video and audio will ensure that you will not be surprised by your opponents, anticipate their movements and achieve another victory!

Noise reduction - talk on the phone wherever you are

With MoriPods you can not only listen to music, but also talk on the phone - even in an extremely noisy place. The 2-way microphones capture your voice perfectly, and CVC 8.0 noise-canceling technology eliminates unnecessary background noise, allowing you to communicate freely. Office, mall, crowded bus - no matter where you are, with Haylou you can talk on the phone whenever you want!

Convenient touch operation

Want to change the song playing or activate the voice assistant, but don't have your phone at hand? No problem! Haylou MoriPods have built-in easy-to-use touchpads that provide quick and convenient access to many useful functions. Among other things, you can use them to answer or reject incoming calls, pause or resume playback, switch songs, and get help from your smart assistant.

Listen to music for hours

Haylou MoriPods feature an improved chip with incredibly low power consumption and a powerful polymer-lithium battery. This allows the headphones to play music for up to 6 hours on a full charge! The handy charging case you will find in the set allows you to extend this time up to 24 hours. So you can listen to your favourite songs at home, at work or while travelling on a train - MoriPods will not fail you when you need them!

Designed to meet diverse user needs

MoriPods impress with their stylish, modern design. They are available in several colors - choose the best one for you! The headphones are also incredibly comfortable. Thanks to their ergonomic design they fit perfectly in your ears and provide the comfort you want. Each one weighs just 3.9g so you won't even feel you're wearing them. IPX4 water resistance means they're safe from drops of rain or sweat - so you can take them for a walk or workout without worry.
