Bone Conduction Headphones Haylou PurFree BC01 (black)

Haylou PurFree BC01 bone conduction headphones

The Haylou BC01 wireless bone conduction headphones are perfect for workouts and more. They are extremely lightweight, comfortable and water-resistant, and provide high-quality sound. They boast a runtime of up to 8 hours and support fast magnetic charging. Bluetooth 5.2 guarantees lightning-fast transmission, while cVc noise reduction and dual microphones will let you talk freely on the phone.

Convenience and safety

Why are bone conduction headphones an ideal option for athletes? Not only are they lightweight and comfortable, but they won't clog your ears or isolate you from your surroundings. So you can hear what's going on around you at all times and, for example, chat with friends. Similar devices are also safer for your health - they reduce the risk of hearing damage. Since they are not inserted into your ear canals, they also allow you to reduce contact with bacteria and dirt.

Lightweight, comfortable, waterproof

Haylou BC01 headphones are an excellent choice for active people. They weigh just 28g, and thanks to their ergonomic design they provide comfort. What's more, they stay firmly in place. At the same time, they are extremely durable and flexible - you can easily adjust them to your needs. Skin-friendly silicone is used in their manufacture. They are also IP67 waterproof, so you can use them even during

extremely intense workouts. They are not intimidated by drops of sweat!

High quality sound

Haylou proves that bone conduction headphones can also provide high quality sound. Thanks to the PurFree BC01's technological solutions, they offer rich details and powerful, deep bass. In addition, the thoughtful design prevents sounds from getting into the environment. Don't be afraid that someone will hear the music you are playing! You'll also find earplugs included, so you can cut off outside noises and better focus on your podcast or favorite song.

Perfect for conversations

The PurFree BC01s will also prove indispensable for phone calls. They're equipped with dual microphones and support cVc noise cancellation technology, so they'll not only record your voice perfectly, but also eliminate unnecessary background noise. This gives you the assurance that your callers will hear you without any problems - no matter if you're running through the city center or riding a crowded bus!

Reliable wireless transmission

Don't let signal problems prevent you from listening to your favorite playlists during your next workout. The BC01 headphones are equipped with an advanced Qualcomm 3044 chip and support Bluetooth 5.2 technology, which guarantees even faster and more stable transmission. Also noteworthy is the aptX codec, which allows you to listen to music wirelessly in high quality. You can also pair the headphones with 2 devices at the same time and switch between them freely.

Long runtime

Listen to music during your workout or on a bike ride without worry - the headphones won't drain too quickly. The BC01's operating time reaches 8 hours - enough to play about 200 songs. An additional advantage of the product is magnetic fast charging. Plug the headphones into the power supply for about 10 minutes, and you will gain the ability to listen to music for another 2 hours! To charge the BC01 to 100%, you only need about 1.5 hours.

User-friendly

Operating the PurFree BC01 headphones is extremely easy. Convenient use of their most important functions is made possible by buttons located in easily accessible places. With their help, for example, you can pause and resume playback, answer the phone or switch a song. It's a perfect solution for your workout - you don't have to reach for your smartphone every time, because everything you need is at your fingertips!
