

Directors Kit PolarPro Recon VND Matte Box System

Directors Kit PolarPro Recon VND Matte Box System

Ref: 817465028100

PolarPro Recon Directors Kit VND Matte Box System - Enhanced Kit.

Create even better shots. In the kit you will find 3 different types of PolarPro filters - Mist 1/4, BlueMorphic and VND3-6+. They are made of high-quality German Cinema Series glass, which guarantees their durability. The assembly of the individual elements is extremely fast and will not cause you any problems. The set also comes with a practical protective case for easy storage and transportation.

Spectacular effects

The filter set will help you take perfect shots that will delight everyone. The Mist 1/4 filter will allow you to achieve a fantastic hazy effect without losing focus, which gives your images a cinematic feel. The Bluemorphic filter causes blue flares, while the VND filter perfectly reduces light even in extremely bright environments - it will easily cope, for example, when recording at sunrise. What's more, a special aerodynamic hood will help reduce drag when shooting on car tracks or in airports.

Carefully considered design

The specially designed design of the Recon VND Matte Box System provides incredible comfort during use. It also guarantees speed and versatility, which is especially important when filming in different lighting conditions. What's more, the handy hood and flag will allow you to easily transform the Recon into a practical, yet compact Matte Box System. The use of a quick-release lever will allow you to instantly expand or retract the hood.

Even more possibilities

The kit allows for as many as 6 powerful configurations for unparalleled versatility. You can easily combine components to create unique configurations, such as a threaded base and hood/flag or VND 3-6+ filter and Stage 2 filters (sold separately). What's more, both assembly and disassembly and configuration is extremely fast and is done without any tools.

Included

Mist 1/4 filter

VND 3-6+ filter

BlueMorphic filter

aerodynamic hood

lens hood

protective case

base with thread
