### Havit G180BT Wireless Controller (White)

In the gaming world, where technology and aesthetics go hand in hand, the Havit G180BT Wireless Controller stands out as the perfect companion for every gamer. Combining modern design with advanced features, this controller provides unparalleled comfort and performance. Its white, transparent casing with colorful RGB lighting adds a unique character to the device, setting it apart from the competition. This is further enhanced by its ergonomic shape and custom button settings, making it the ideal tool for gamers looking to immerse themselves in their favorite digital worlds.

### Modern Design with RGB Lighting

The Havit G180BT Controller combines aesthetics and modernity. The transparent casing highlights its futuristic character, and the colorful RGB lighting (with an option to turn it off) adds individual style. This design not only looks attractive but also allows for device customization, reflecting the player's personality and preferences.

### Advanced Bluetooth 5.0 Technology

The use of the latest Bluetooth 5.0 version in the G180BT controller ensures a stable and fast connection up to 10 meters away. This feature provides uninterrupted gameplay without delays, which is crucial in dynamic and demanding games.

#### High-Sensitivity Joysticks and Ergonomic Design

The controller's joysticks are characterized by high sensitivity, resulting in precise control in games. The ergonomic design ensures comfort even during long gaming sessions, minimizing hand fatigue and providing easy access to all buttons.

#### Custom Button Settings and TURBO Function

The controller offers custom button settings, allowing gamers to personalize their layout. The TURBO function, with three repeat speeds (5, 12, 20 per second), enables fast and efficient gameplay tailored to the user's needs.

#### Universal Compatibility and Efficient Battery

The Havit G180BT is compatible with various devices, including consoles, televisions, computers, and smartphones, making it a versatile tool for every gamer. The 800mAh battery provides 5-10 hours of work, and quick charging (2-2.5 hours) allows you to get back to gaming quickly.
