Smart following pan-tilt Telesin (TE-GPYT-001)

Ref: 6972860171272

The Telesin TE-GPYT-001 Intelligent Swivel Tripod

The state-of-the-art tripod from Telesin gives you a range of new possibilities when recording. Rotating 360° and offering intelligent tracking - it will allow you to create exactly the shots you want. The built-in HD camera provides excellent image quality and the battery life of up to 5 hours guarantees the freedom you dream of. Use the included remote to control the tripod. Moreover, 1/4 threads allow you to mount additional accessories.

Effectively keeps the person being filmed inside the frame

The tripod rotates 360° and intelligently follows the subject being filmed. Its optimal operating range is from 1m to as much as 8m. This makes it suitable for a multitude of applications. You can use it during an online meeting, webinar, recording tutorials and even when selling various products over the Internet. The advanced algorithm allows for real-time tracking, which also allows for live streaming.

Mount additional accessories

There are universal 1/4 threads on the top and bottom of the unit with which you can mount additional accessories. Tripod, lighting, camera, phone or camera adapter, or maybe a microphone? The possibilities are almost endless. What is more, you can adjust the threads in such a way as to provide the attached accessories with the required stability.

Create without worrying about your device draining too fast

The tripod is equipped with a durable 1500 mAh battery. It allows up to 5 hours of recording after one full charge, which takes about 2 hours. Moreover, you do not have to worry about premature discharge of the device if you forget to turn it off. The tripod automatically goes into sleep mode after 15 minutes of inactivity.

HD panoramic camera - even more applications

The device's built-in HD camera can also act as a webcam. The device is compatible with most laptops of popular brands. So you can enjoy excellent quality video chats with your friends, family or co-workers! To use this feature, you need an adapter.

Discover the benefits of remote control

The kit also includes an easy-to-use remote control that will make your work with the smart tripod even easier. With its help, you can conveniently control the device from a distance. Not only can you turn it on or off, but you can also start the tracking function. You will also gain the ability to control the rotation of the tripod.
