

Brake Fluid Liquid Tester Habotest HT662

Brake Fluid Liquid Tester Habotest HT662

Ref: 5905316141063

Habotest HT662 brake fluid tester

Habotest HT662 will allow you to measure the percentage concentration of water contained in brake fluid. It supports different types of fluids and displays the measurement results on a small screen. It is equipped with a sensitive probe and is distinguished by its fast response time. Moreover, it provides an audible and light alarm. It automatically turns off after 5 min of non-use, and 2 AAA batteries (included) are responsible for its power supply.

Practical

The permissible concentration of water in brake fluid is between 0 and 3%. If this level is exceeded, the fluid should be replaced. The Habotest tester will allow you to check this value and ensure your safety while driving your car. The measurement results will appear on a small display. In addition, the device offers an audible and light alarm - it will indicate the concentration level with the appropriate color.

Convenient operation

Using the tester will not cause you any problems. To take a measurement, you just need to dip the probe into the liquid. The device is also equipped with buttons with which you can turn it on/off or select the type of brake fluid. Responsible for its power supply are 2 AAA batteries, which you will find in the kit - if you want to insert them, twist and open the special cover.

Thoughtful design

Habotest HT662 is equipped with a reliable probe, which is distinguished by its long service life and corrosion resistance. In addition, it will automatically turn off after 5 min of non-use to save energy. The use of ABS plastic makes the product resistant to drops, water and dust, and a special clip will allow you to clip the tester to your pocket. In addition, thanks to its compact design, it will not take up much space.

Included

brake fluid tester

batteries 1.5V x2

instruction manual

Manufacturer

Habotest

Model

HT662

Material

ABS

Display

LCD

Measurement range

0%~4%
