

## 6 Adjustable Lens Filters Sunnlylife for DJI AIR 3 A3-FI689 -

Ref: 5905316148840

6 Adjustable Lens Filters Sunnlylife for DJI AIR 3 A3-FI689 - MCUV+CPL+ND4+ND8+ND16+ND32

Sunnlylife A3-FI689 Adjustable Lens Filter Set 6 Pieces MCUV+CPL+ND4+ND8+ND16+ND32 for DJI AIR 3

Sunnlylife filters guarantee faithful color reproduction while protecting the lens from scratches, moisture, and oily smudges. They are an ideal choice for both hobbyists and professionals seeking excellent photo quality in various conditions. The frames are made of lightweight aircraft-grade aluminum, giving them unmatched durability.

### CPL Filter - Enhance Natural Beauty

The CPL filter is an essential component that effectively removes reflections from non-metallic surfaces, intensifies colors, and highlights the beauty of the sky, clouds, and water. It is indispensable for situations like shooting through glass, over water, or underwater, creating unique effects in varying lighting conditions.

### ND/PL Filters

ND/PL filters protect against overexposure, resulting in richer and more saturated colors. By shortening the exposure time, they allow you to capture crystal-clear details, while extending the exposure time enables you to create picturesque water shots by reducing polarized light.

### MCUV Filter

The MCUV filter reduces the amount of ultraviolet light reaching the lens, improving the quality of light transmission. In mountains and highlands, it increases image depth and sharpness while protecting the lens from damage.

#### High Quality

Sunnylife filters are compatible with the DJI AIR 3 camera, made of aluminum and optical glass, weighing only 4 grams each, and are compact for convenience and ease of transport. The set also includes a stylish case with soft EVA foam lining to protect the filters during transport.
