Cup blender AMZCHEF 8088-GA (Grey)

Ref: 0730637296384

### AMZCHEF 8088-GA cup blender (gray)

The AMZCHEF 8088-GA blender is an appliance with an impressive 2,000 watts of power and 2-liter capacity, which allows you to quickly and efficiently blend a variety of ingredients. With it, you can easily prepare smooth smoothies, creamy soups or ground ingredients without spending too much time in the kitchen. The AMZCHEF 8088-GA is a blender that will meet the expectations of even the most demanding cooks. Its versatility and ease of use make it ideal for both professionals and amateur cooks.

### Capacious and powerful

With a capacity of 2 liters, the blender is ideal for family kitchens and for cooks who often prepare meals for many people. Its speed of up to 25,000 revolutions per minute, which, combined with its eight stainless steel blades, guarantees exceptional performance and velvety-smooth consistency in blended soups and smoothies.

### Innovative design and safety

The 8088-GA blender is distinguished by its non-slip handle for comfort and hassle-free use. An improved safety system automatically shuts off the blender when you lift the cup, completely eliminating the risk of accidents. In addition, the silicone base ensures the stability of the device during operation, so you can be sure that the blender will stay in place to avoid spilling the contents.

#### Adjustable speed and intuitive operation

With the AMZCHEF blender, preparing a smoothie or a flavorful sauce is effortless. You can crush ice and grind meat with ease. With 8 speed stages, the device allows you to fine-tune it for different types of ingredients. The intuitive operation makes using the blender easy and fun, and the large, convenient inlet in the lid makes it easy to add ingredients while blending.

#### Easy to clean

The blender is designed with ease of cleaning in mind. Easily removable components and dishwasher-safe capabilities make cleaning up after preparing meals quick and easy. What's more, washing the cup and blades themselves only requires pouring in water and running one of the programs, and in just a few seconds the device will be clean and ready for the next task.
