

Barco telecomandado Joysway Baiting 500 V3

Barco telecomandado Joysway Baiting 500 V3

Ref: 6949762230079

Better in every detail

The Baiting 500 V3 is a heavily refreshed version of the previous boat from the well-known manufacturer of various RC models, Joysway. The new version of the popular boat, has been fitted with an improved loader and an improved loading door. At one time, the boat can take 500g of cargo transporting it up to 200m and dropping it at a location of our choice, such an operation can be repeated many times. In the cargo hold we can place 1-2 hooks connected to magnetic hooks at the back of the boat, which will hold it in place and detach it when pulled by a fish. The boat has been designed to make as little noise as possible to scare the fish away. An added bonus is the LED lights so we can also use it at night.

Expansion possibilities

The Baiting 500 allows you to mount a wireless underwater camera (not included) to check depth and locate fish. Its great advantage is that you can watch the fish swallowing the hook for additional entertainment. A wireless (or WiFi) echo sounder mounted in the boat is certainly another accessory we can install.

Included:

Joysway Baiting 500 V3 4-channel transmitter 4 x magnetic hook Charger 4.8V 5000 mAh NiMH battery pack Length 535 mm Height 140 mm Maximum weight with load 1800 g Unladen weight 1650 g Instrument range

(only dry bait with a maximum size of 15 mm) Maximum unloaded speed 1.2 m/s Maximum speed with load 1 m/s
