

Camera Akaso Brave 7

Camera Akaso Brave 7

Ref: 0810082450484

Akaso Brave 7 sports camera

Need a sports camera that can help you get high-quality, dynamic shots? The Akaso Brave 7 can capture video at 4K/30FPS and offers a range of functional modes. It features IPX8 water resistance, voice command support or the use of a 6-axis gyroscope.

High quality

Planning a trip and want to keep the memories not only in your head? The Akaso Brave 7 camera records video in 4K/30FPS quality and takes 20MP photos. This will give you crystal clear, crisp image that will let you revisit the best moments not only in your imagination!

2 color displays

The device uses 2 color displays - on the front and on the back of the camera. This allows you to constantly control the shots you get, so you'll capture everything exactly as you plan!

Many useful modes

With the Brave 7 you'll get plenty of opportunities to create the shots of your dreams. Slow motion, timelapse or looping? No problem! You can also take advantage of wide-angle settings (70° / 110° / 140°), special dive mode, Timed Photo and Still Photo.

More amenities

The Akaso Brave 7 camera uses a number of modern functional features that watch over the smoothness and quality of the image. The 6-axis gyroscope, combined with EIS 2.0 technology, greatly improves stabilization, allowing you to get fantastic shots - even during highly dynamic activities.

Thoughtful design

As a rule, sports cameras should be versatile and durable. That's why the Akaso Brave 7 relied on IPX8 waterproof rating when designing and manufacturing it. This means that it can easily withstand even immersion up to a depth of 5 meters. Freely record in the rain, while swimming, surfing or diving - without worrying about damaging your equipment! The device is also resistant to impact and wear.

More with the app

Want even more options for managing your photos and recordings? Install the AKASO GO app. It will give you plenty of editing options for all your footage, allowing you to customize its style to your own preferences. The app also allows you to share prepared photos and videos - quickly and conveniently!

Convenience and functionality

The included remote control with a wrist band is responsible for highly comfortable operation of the device. This solution allows you to instantly manage the operation of the camera - without using the touchscreen interface. What's more, in a separate sale you will also find a dedicated microphone with wind noise reduction function. The camera also offers control via voice commands.
