

Telescopic phone/tablet stand Lisen (black)

Telescopic phone/tablet stand Lisen (black)

Ref: 5905316149168

Lisen Telescopic Stand for Phone/Tablet (Black)

The Lisen Telescopic Stand is a thoughtful combination of material durability and advanced technology, providing support for mobile devices with screen diagonals ranging from 4.7" to 15.6". The sturdy, adjustable construction based on steel ensures stability, while wear-resistant materials ensure long-lasting use.

Durability and Safety

When designing the Lisen stand, steel with a rating of 1800MPa and carbon ceramic were used to ensure durability and resistance to loads of up to 5 kg. The stabilization mechanism is designed to keep the device in pristine condition, even with intensive touch screen interaction.

Adjustable Design

The ergonomics of the Lisen stand allow for easy height adjustment, allowing you to customize the device's position to your individual needs. This solution provides optimal conditions for work, study, relaxation, and also protects against discomfort during extended use of mobile devices.

Minimalist Design

The Lisen stand combines elegance and practicality. Its foldable design facilitates storage and transport, making it an ideal solution for both stationary and mobile use. The product harmoniously complements various interior arrangements while maintaining its professional character.

Universal Application

You don't have to limit yourself. The Lisen stand offers full compatibility with various models of phones and tablets, adapting to individual sizes and requirements of devices with screen diagonals ranging from 4.7" to 15.6". It is essential equipment for anyone who values the reliability and safety of their devices.
