Earbuds True Wireless Joyroom JR-PB1 ENC (Black)

Ref: 6956116783099

Earbuds True Wireless Joyroom JR-PB1 ENC (Black)

Listen to your favorite tunes for a long time without discomfort. The Joyroom JR-PB1 earbuds feature a lightweight and ergonomic design. What's more, they work on a single charge for up to 8 h, and the charging case extends playback time up to 24 h. Built-in ENC noise-canceling microphones eliminate ambient noise, and low latency enhances immersion during gameplay. In addition, the earbuds are IPX4 water-resistant and the touch panels allow for simple operation.

Lightweight and comfortable

Enjoy comfortable use with the Joyroom JR-PB1 earbuds feature a 45° curved design for stability. You don't have to worry about the earbuds falling out of your ears. What's more, they are comfortable and do not cause discomfort. Each headphone weighs just 3.5 grams.

ENC noise-canceling microphones

Carry on conversations and don't worry about ambient noise. The earbuds are equipped with 4 microphones (combined) with ENC noise cancellation. This effectively mutes outside noises, allowing you to enjoy HD phone conversations. Now you can be sure that your caller will hear you.

Up to 24 h of playback

Listen to your favorite songs for up to 8 h on a single charge. The charging case, on the other hand, allows you to renew the energy of the earbuds up to 3 times, which translates into a total of 24 h of playback. Included in the package, you will find a USB-A to USB-C cable, with which you will charge the JR-PB1. After about 1.5 h, they will be ready for further use.

Comfortable operation

The earbuds are equipped with touch panels, which make operating the earbuds simple and intuitive. From them, you can stop/restart playback, reject/receive/end a call, skip a song or activate the voice assistant.

Additional amenities

You can take the Joyroom JR-PB1 to the gym or use them in the rain. The earbuds are IPX4 dust, sweat and water-resistant, so you can use them without worrying about getting splashed. What's more, they stand out for their low latency, providing better audio and video synchronization, which will work well for watching movies and playing games.
