

## Wired Earphones Joyroom JR-EW07, Half in Ear (Black)

Wired Earphones Joyroom JR-EW07, Half in Ear (Black)

Ref: 6941237145642

Joyroom JR-EW07 wired in-ear headphones, (Black).

Meet the Joyroom JR-EW07 headphones, which combine superior sound quality with unparalleled comfort and functionality. The unique design with a 13° tilt ensures a perfect fit without causing discomfort even during long hours of listening sessions. Convenient built-in controller with microphone and wide frequency response range make the headphones meet the expectations of the most demanding users.

Carefully thought-out design

Using the headphones for long periods of time no longer has to be an anguish. With a 13° tilt angle and an ergonomic design, the Joyroom JR-EW07 headphones fit perfectly to the shape of your ear. The headphones will work well in many scenarios - the cable length of 1.2m gives you freedom of movement while running, cycling or relaxing at home.

Built-in controller for your convenience

An integrated remote control with microphone gives you full control over music and calls, without having to take your phone out of your pocket. Change songs, answer and end calls with ease using the intuitive buttons.

Sensitive microphone for casual conversations

Talk to your loved ones as if they were next to you The Joyroom JR-EW07 headphones' sensitive microphone provides HD quality conversations. Whether you're in a crowded place or a quiet room, your conversations will always be clear and noise-free.

#### Superior sound quality

With 14.2mm drivers and a frequency response range of 20Hz to 20KHz, the Joyroom headphones provide a full spectrum of sound. From deep bass to crystal clear treble, every musical detail is accurately reproduced, so you can listen to your favorite tunes while feeling like you're at a real concert.
