

Car dashboard holder Joyroom JR-ZS350 (Black)

Ref: 6956116768393

Car dashboard holder Joyroom JR-ZS350 (Black)

Joyroom JR-ZS354 (Black) car dashboard mount.

The JR-ZS354 is a car mount for your phone that has a number of advantages. The first is that it sticks to your dashboard with an adhesive pad that won't peel off over bumps or leave sticky residue after you take it off. The second advantage is that the arms on the holder can be adjusted so you don't have to remove your phone from the holder - even if your case makes your device much thicker. Another advantage is that the holder can be rotated 360 degrees - turn your phone in any direction to make it as comfortable as possible for you.

High adhesion

JR-ZS354 is a car mount for your phone, which is distinguished by a number of practical features. Its first advantage is a unique mounting system using an adhesive pad. Thanks to this solution, the holder maintains stability even when driving on uneven surfaces, and at the same time does not leave an unsightly residue when it is removed.

Versatility

Another important feature of this holder is the adjustable arm design, which allows the holder to freely adapt to phones of different thicknesses, even when they are placed in a case. You no longer have to worry about removing your phone from the case every time you want to use the holder - a convenient solution for users who value practicality.

Practicality

The JR-ZS354 mount also offers a 360-degree rotation function, allowing you to position your phone in your preferred direction at will. Whether you need to use the navigation, music player or simply monitor phone calls, this mount provides comfortable visibility from any angle. With these features, this product is not only a practical support in the car, but also a convenient and functional solution for mobile device users.
